Profile

Senior Data Analyst with 7+ years of experience designing data-driven reporting systems, strengthening data governance frameworks, and automating analytics workflows within healthcare and mission-driven organizations. Experienced in Python-based data processing, ETL automation from flat-file sources, advanced Power BI modeling (Power Query & DAX), and relational data concepts. Recognized for establishing documentation standards, improving data quality, mentoring colleagues on best practices, and promoting a data-informed culture that supports operational and strategic decision-making.

Skills

Data Engineering & Automation

Python (Pandas) for large dataset processing | ETL automation from CSV/Excel/API exports | Workflow optimization | Data ingestion & transformation pipelines

Business Intelligence & Modeling

Power BI (Advanced DAX measures, Power Query M transformations) | Relational data modeling | KPI development | Dashboard architecture | SQL (data extraction & validation)

Data Governance & Documentation

Data dictionaries | Metadata standards | SOP development | Data quality frameworks | Source-to-target mapping | Audit support | Privacy-compliant data handling (PHIPA-aligned)

Analysis & Insight Generation

Trend analysis | Performance monitoring | Root cause analysis | Cross-platform data rationalization | Indicator standardization

Leadership & Collaboration

Stakeholder requirement gathering | Technical mentoring | Cross-functional coordination | Data governance forum participation | Consensus-building in complex environments

Work Experience

09/2024 – 09/2025
Vancouver, Canada

Senior Business Advisor (Data Analytics) Vancouver Coastal Health

- Led advanced data analysis initiatives using large clinical and administrative datasets to support operational performance and system-level planning.
- Designed and optimized Power BI dashboards utilizing complex DAX measures and Power Query transformations to standardize reporting across programs.
- Automated recurring reporting workflows through structured data transformation processes, reducing manual handling and improving timeliness.
- Conducted source system data analysis and maintained source-to-target mapping documentation to ensure reporting accuracy and alignment.
- Established documentation standards including indicator definitions, metadata specifications, and data processing methodologies.
- Strengthened data quality through structured validation, reconciliation, and issue resolution processes.
- Collaborated with cross-functional leaders to define performance indicators aligned with organizational strategy.
- Promoted governance best practices and contributed to improving reporting consistency across business units.

Work Experience

08/2019 – 05/2023

Abuja, Nigeria

Program Officer, Data & Analytics Gates Foundation

- Managed multi-source program datasets and implemented structured cleaning and validation processes to ensure analytical integrity.
- Developed dashboards and analytical summaries using standardized indicator frameworks for leadership and donor reporting.
- Documented metadata, reporting definitions, and data standards to maintain consistency across partner systems.
- Conducted advanced trend and comparative analysis to identify service gaps and performance risks.
- Supported governance and accountability processes through structured reporting and audit-ready documentation.
- Strengthened cross-platform data harmonization efforts to improve comparability and reliability of program data.

08/2017 – 08/2019

Abuja, Nigeria

Performance Measurement & Reporting Lead John Snow Inc.

- Designed standardized monitoring frameworks and reporting schedules to support routine performance management.
- Conducted root-cause and variance analyses to inform corrective action planning.
- Formalized data definitions and collection standards to improve data governance practices.
- Delivered dashboards and documentation supporting transparency and accountability.
- Coordinated reporting processes across teams to rationalize data collection and reduce duplication.

01/2014 – 05/2017

Nigeria

Health Analyst (Population Health) Abt Associates

- Conducted statistical analysis on large population datasets to identify risk patterns and system-level insights.
- Developed reporting systems and dashboards to support evidence-based program decision-making.
- Contributed to monitoring, evaluation, and learning initiatives using structured analytical methods.

Education

09/2024

Lethbridge, AB, Canada

Biostatistics and Epidemiology | Graduate Certificate University of Lethbridge

Manchester,
United Kingdom

Public Health | Master of Public Health University of Manchester

Certifications & Professional Development

06/2023 – 08/2026

Waterloo, Canada

Program Evaluation | Certificate Wilfrid Laurier University

Professional certificate focused on evaluation design, methods, and applied practice. Developed practical skills in creating evaluation plans, assessing program effectiveness, and integrating ethical, equity-focused, and community-engaged approaches into evaluation work.
